

Available Storage Capacity 2010/2011 (2011/2012)

Dear Customer,

Please note this is an announcement about **the available storage capacity** at the storage facilities of Nafta. We hereby **invite interested parties to contact** the storage operator for conditions of provision of storage services. The **price** for storage services will be subject to approval of both parties but cannot exceed the maximum regulated tariffs as approved in the Regulator's price decision. For your information, please see also the Rules of Operation and the Technical Conditions of our storage facility.

Nafta will enter into the negotiations with all interested parties with **the preference given to the entities that showed early interest**.

The available storage capacity of 25 mcm is offered for the period starting on the agreed day during the injection season 2010/2011 and ending either at the end of withdrawal season 2010/2011 (30 April 2011) or at the end of withdrawal season 2011/2012 (30 April 2012). The working gas volume has to be injected before the end of the injection season 2010/2011. The storage capacity is offered in **5 mcm bundles (in total 5 SBUs)** with basic flat withdrawal and injection rates included yielding 110 days deliverability and injectability.

The available individual Withdrawal Rate is 430,000 cm/day and the available individual Injection Rate is 430,000 cm/day on a flat basis. The **available individual Rates** are available for both **new and existing customers** on conditions mutually agreed between parties.

Available Products

	5 Standard Bundled Units	Individual Services
Working Gas Volume	5 mcm per SBU	
Withdrawal Rate (flat)	Flat 45,500 cm/day per SBU	Flat 430,000 cm/day
Injection Rate (flat)	Flat 45,500 cm/day per SBU	Flat 430,000 cm/day

The storage system operator regards this offer valid **until 15 September 2010** and is entitled to cancel this offer at any time.
